

Loss Monitoring to meet the UPSS Regulations

Do you have a Loss Monitoring Procedure in place for your Underground Petroleum Storage System (UPSS)?

The NSW Department of Environment, Climate Change and Water (formerly the EPA) have introduced regulations which require all owners or operators of sites with UPSS to have a Loss Monitoring Procedure in place.

What is a Loss Monitoring Procedure?

A Loss Monitoring Procedure is an inventory control (utilizing statistical inventory reconciliation) of the petroleum contained in a UPSS to identify a discrepancy in the volume of fuel (either loss or gain) and the means to record the results and trigger the need for any further action.

Why have a Loss Monitoring Procedure?

A Loss monitoring Procedure enables early detection of any losses of petroleum from your UPSS tanks or piping before they pollute the soil, surface waters or groundwater. Loss detection is also useful for identifying fuel theft.

Loss monitoring is mandatory since 1st June 2009

GroundTruth environmental engineers have developed TankCheck™ to help you meet the new regulations.

The TankCheck™ Tool

GroundTruth can supply a site specific loss monitoring program which is tailored to suit your particular tank and pump configurations. You can record your daily dips, meter readings and drops so that TankCheck™ can automatically and quickly reconcile any losses on a daily or monthly basis or anytime period you wish.

Automatic software such as TankCheck™ ensures all calculations are accurate and it will store all your data for a minimum of two (2) years as required under the UPSS guidelines.

Operates on Windows XP and higher.

The **TankCheck™** Daily Sales Recording form.

PURCHASE COST

The purchase cost of the software is \$600 (ex GST) for a three (3) tank site. Additional tanks are added to the software at a cost of \$150 (ex GST) per tank.

The software comes with a registration pass code which is valid for twelve months and requires renewal for an annual license fee of \$150 (ex GST). This entitles you to free upgrades of the latest version of the software.

PAYMENT ORDER FORM

Up to 3 Tanks \$600 — (\$660 includes GST)
Each additional tank \$150 — (\$165 includes GST)

Number of Tanks: _____ Amount to be charged: \$ _____

Please include 10% GST
